Training offer

Course Name: A Man Of Security In Resisting Terrorism

Code NO: Technical Security

Date: 29-Sep-2019

Course Overview:

Terrorist bombings at many parts of the World; mass shootings by disgruntled employees in their workplaces; thefts of billions of dollars in high-tech equipment and proprietary information—in today's modern world, corporations, government agencies, hospitals, and schools face a wide new range of threats. In response to this new array of threats, the organization must respond by deploying a competent and professional security force to protect its assets. Assets encompass physical property, personnel, and information.

This training is designed to be a guide for security managers and security trainers who are seeking to improve the quality and professionalism of their security force, but are faced with time and budgetary constraints.

Training Objective:

At the end of this training, successful candidates will have good understanding and competence in dealing with all sorts of terrorism threats and in practicing various threats scenarios in the workplace

Training Methodologies:

This program consists of modules containing lecture content, skill assessments, case studies participative discussions, video presentations and delegate exercises in order to create high impact training.

The program is designed to be dynamic and highly interactive as well as educational. The primary focus is to provide delegates with concepts and methods which they can put to immediate use in the workplace.
