Metals Mechanical (Pipefitter) Course

Reference Code: TEC 457

Course Overview

This short training course provides systematic refresher training in order to pass the “Contractor Workforce Assessment Test” as provided in the AITC premises. In close relation to the test requirements, the course deals with the essential background on knowledge of metals mechanics be-Ing identified on “must know-level”. This short training course cannot provide foundations.

Who Should Attend?

This short training course is addressed to experienced “metals mechanics” who intend to participate in the “Contractor Workforce Assessment Test” or are in need of a refresher course before participating in the respective test. The course is not suitable to qualify newcomers and inex-perienced persons in the metals mechanical discipline due to the limited time and the more theoretical nature of the contents. Participants should possess the required technical knowledge already.

Enabling Objectives:

The training provides a very quick review on a number of technical subjects, which could be part of the Contractor Assessment test.

- Health and safety at the workplace
- Identification of hazards and precaution measures
- Lockout-Tagout procedures
- Use of Hand Tools
- Proper use of Lifting Equipment
- Describe Piping Systems, Symbols and Installation equipment
- Installation and removal of valves and piping equipment
- Identification of valves
