ت.س. ± ۲۰۰۰، ۲۶۰۲، C.R. 2055024564

# **Program Outline**

**Course Name: Supervisory Skills for Industrial Security.** 

**Code NO:** Technical Security

Date: 16-Jun-2019

#### **Course Overview:**

Security personnel are increasingly being given more responsibility and facing more sophisticated threats than ever before. Training and professional development must keep pace with these changes if the security department is to continue to effectively protect the organization.

This training provides the best tool for realistically preparing the security force to deal effectively with a wide range of situations. It will also assist security supervisors in developing more effective and realistic security programs.

### **Course Objectives:**

At the end of this workshop fashion training, delegates will:

- Understand the basics for security supervision
- Be able to effectively plan, support employee motivation, observe and give feedback, and address performance problems with subordinates.
- Be able to understand the fundamental issues of the Security System in industrial setting
- Gain a broader understanding of the principles of asset protection in the interest of the employees and visitors
- Strive for high levels of career achievement
- Be able to improve the quality of job performance of protection by applying high level of security practice
- Be able to deal with various issues and special situations (threats, non-compliance, environmental, etc.)
- Efficiently communicate with all concerned parties and individuals
- Be able to handle basic emergencies like, fire, chemical hazard, first aid, etc.
- Training Methodology:
- This program consists of modules containing lecture content, skill assessments, participative discussions, video presentations and delegate exercises in order to create high impact training. The program is designed to be dynamic and highly interactive as well as educational. The primary focus is to provide delegates with concepts and methods which they can put to immediate use in the workplace.
