

Learning Topic: Technical (Plant Processes & Operations).

Course Name: The Process Operator Duties

Reference Code: PLOP 122

Course Overview:

This course is one of the basic training courses for any operation staff member.

Changes in technology, processes, and process equipment are coming so fast that today's process operators must be multi-skilled and highly trained to keep current in their jobs.

Safety is a critical factor in the process industries, and this further underscores the need for highly trained, competent process operators.

This course covers the roles and responsibilities of today's process operator, the competencies required of a process operator, the training and qualifications required to be a process operator, and the requirements for process operator certification.

Course Objectives:

At the completion of this module, you will be able to:

1. Define the responsibilities of today's process operator.
2. Describe the competencies required of a process operator.
3. Outline the training, qualifications, and certification necessary to be a process operator.
4. Describe the field activities of the field operator

Training Methodologies:

The training methodology is interactive and is suitable for all employees involved in maintenance and operations management enhancing the following:

- Pre-test and Post-test
- Variety of Learning Methods & examples
- Presentation
- Lectures
- Group Work
