

Course Name: VTS Supervisor – Advancement Training 103 (V-103-2) Standard- IALA

VTS Supervisor Course covers the advanced training and is intended for operators who already have the VTS Operator (VTSO) certificate who have completed the V103/1. The course is generic, held in a classroom with simulators for support. The final license to perform of the function of a VTS Supervisor also requires completion of the On the Job Training. If the student has not performed the On the Job Training as part of their operator training, they will be required to complete this training prior to working in the post with VTS. The on the Job training is linked to the port on which the VTS operation will take place, hence, in order to perform the job of a VTS Supervisor in another port, a new On the Job Training will be required.

This course will be of interest to staff who are responsible for supervising the VTS operations. Candidates who have a valid certificate of V-103/1 and comply with any additional requirements are eligible to upgrade their professional accreditation for V-103/2.

Code: MAR 801

Course Objective:

At the completion of the course the student should have acquired the skill levels required, in accordance with the requirements established in IALA V103/2 to perform the duties of Vessel Traffic Service Supervisor.
